

### Festo

We want to help our users to increase their productivity. We combine our knowledge with a passion for detail, never losing sight of the big picture. We foster sustainable growth and keep the world moving. We develop and produce motion & control solutions for the food industry. Together with our customers we have gained a lot of knowledge and experiences in different food applications. Gripping, handling, Industry 4.0 and (co)robot-technology are important topics for us.

### Company profile and contribution to the COTEMACO project:

We want to help our users to increase their productivity. We combine our knowledge with a passion for detail, never losing sight of the big picture. We foster sustainable growth and keep the world moving. We develop and produce motion & control solutions for the food industry. Together with our customers we have gained a lot of knowledge and experiences in different food applications. Gripping, handling, Industry 4.0 and (co)robot-technology are important topics for us.

We can participate individually with demo-application, but we would prefer to cooperate with OEM's which are using our motion & control technology. Gripping, handling, Industry 4.0 and (co)robot-technology are important topics for us. Potential partners are: Foodmate, Blueprint, VDL, Kaak, Benier, Jansen Techniek, Dero etc.

We can also offer all kind of courses and training material. See for [example](#):
