High Tech NL is the branch association of the Dutch high-tech industry consisting of some 230 members, both companies (OEM, SME and startups) and knowledge institutes. We are committed to the collective interests of the sector, with a focus on long-term innovation and international collaboration. To share specific knowledge, each member participates in one or more of our three clusters: Robotics, Semiconductors and Lifescience Technologies.

Tom van der Dussen
*Project Manager
Holland Semiconductors*

Holland Semiconductors is the Dutch national network of semiconductor companies and knowledge institutes active in the entire value chain. It is our aim to strengthen the semicon sector by stimulating (international) cooperation, initiating new (international) innovation projects and facilitating crossover projects with semiconductors as a key enabling technology (KET). We support international innovation missions, and organize, support and host workshops, seminars, webinars and joint booths at international semicon tradeshows. We fully support the European ambitions for intensifying European and global collaborations. Connecting to the leading high-tech clusters in Europe, Dutch companies and institutes get access to innovative partners throughout Europe. Participation in European projects and in Silicon Europe Alliance are explicit examples of our international collaborative innovation.

Would you like to cooperate and innovate with Dutch companies, technical universities and research institutes? High Tech NL opens the doors to successful cooperation!
