

LouwersHanique

LouwersHanique has been supporting both equipment makers and IC manufacturers for over 50 years. Providing tailor made solutions using all our competencies from UHV precision components in glass and ceramics to feedthroughs, mechatronics and micro-assemblies.

International Business Developer

We are specialized in thermal forming of glass and in mechanical/laser processing of technical glass and technical ceramics (such as aluminum oxide, silicon carbide, silicon and Macor). The company activities also include the bonding and [clean room] assembly of unique material combinations based on an extensive range of bonding and integration technologies. We manufacture Ultra-High Vacuum feedthroughs using proprietary glass-to-metal bonding technologies to directly seal pins and other components into metal flanges without laser welding or other sealing technologies.

LouwersHanique is your international supply chain partner in the field of fully integrated solutions. Our state of the art equipment and clean room facilities allow the precision manufacturing of parts and assemblies with tolerances into the (sub)micron region.

Markets include: semiconductor, analytical, [bio]chemistry, energy, laser and optoelectronics, special lighting, pharmaceutical, medical & life sciences, water purification, replication. LouwersHanique is located in the high tech Brainport Region of the Netherlands and is ISO 9001:2015 certified by TÜV.
